# The Story Behind NexHack 2.0

NexHack 2.0 is a national-level, 24-hour external hackathon hosted on-campus at Geeta University, Panipat. It brings together students, developers, and innovators from institutions across India to build real, working solutions in a single high-energy sprint.

Building on a successful first edition, this year's event is organized by Geeta Technical Hub in collaboration with SCSE, and powered by CodeForge Society. What sets NexHack apart is its scale of themes — from Forensic Tech and Cybersecurity to AI in Agriculture, Web3, and FinTech — judged by a panel of industry experts, startup founders, and investors across three evaluation rounds.
